

**REMARKS**

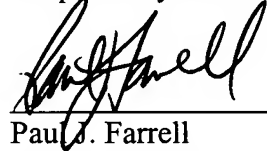

Claims 1-52 are pending in this application. In the Office Action, Claims 1-52 were allowed. In the Office Action, a request was made for filing of certified copies of the two Korean Patent Applications, i.e. KPA Nos. 2003-16455 and 2003-21661, to which this application claims priority; and an indication was made that a corrected Abstract is required that avoids using form and legal phraseology such as "means" and "said" and to avoid use of phrases which can be implied, such as "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

In regard to the request for filing of certified copies of the two Korean Patent Applications, i.e. KPA Nos. 2003-16455 and 2003-21661, to which this application claims priority, a return receipt postcard in Applicant's file indicates that on April 19, 2004, the U.S. Patent and Trademark Office received a Transmittal of Priority Documents that included both certified copies. Accordingly, we contacted the Examiner who was contacted, who kindly checked the file, confirmed that the priority documents were received, and requested that this response indicate receipt of the priority documents in response to the request made in the Office Action.

In regard to the indication that a corrected Abstract is required, an amendment to the Abstract is provided herein, as requested in the Office Action. No new subject matter is presented by this amendment.

In view of the above, it is believed that this application is in condition for allowance.

Respectfully submitted,

Paul J. Farrell
